

SHAPING THE FUTURE OF MOBILITY

#EUYearofRail

10-12 November 2021
LISBON

TECHNICAL EXHIBITION

1. Introduction

The technical exhibition will take place during the three days of the Seminar to allow participants to be introduced to aspects covered by the Seminar - such as the activities of the institutional entities, materials and products, equipment and services.

A total of 22 stands have been planned inside the indoor facilities. This number may be increased if there are expressions of interest (see exhibition plan).

Should any entity wish to exhibit equipment of a larger size than the size of the indoor stands, it may be possible to do so in the outdoor area adjacent to the Congress Centre premises, where the Seminar will take place.

2. Modalities for Participation

The participation of a given entity, public or private, in the exhibition can be done in two ways:

- i) either as a counterpart of SPONSOR given to the event (See SPONSOR GUIDE); or
- ii) only as an EXHIBITOR, according to the following conditions:

Interior

stand (2x3m2) € 2000 (includes 1 Registration)
stand 2x (2x3m2) € 4000 (includes 2 Registrations)

Larger spaces can be made available, maintaining proportionality.

Exterior

Conditions to be established according to the space needs of those interested in exhibiting their products.

1. Layout of the exhibition area (22 rooms)
