

Biography

Nicolas Furio

Head of Technical Affairs, UNIFE – The European Rail Industry

Nicolas Furio is UNIFE's Head of Technical Affairs responsible for the management of the association's Research & Innovation and regulation/standardisation activities. For the past 11 years, Mr. Furio has helped coordinate the European Rail Supply Industry's leading stakeholders engage in research and regulatory-related technical collaborations with European institutions such as the European Commission, European Union Agency for Railways, Shift2Rail Joint Undertaking and others. He previously gained experience in transport project management as a project engineer in France at the Egis Rail engineering company, which designs urban and railway transport projects. Having earlier graduated with a first degree in Civil Engineering from Engineering School INSA in Lyon, Mr. Furio went on to complete a specialised Master in Industrial Strategy at the EM Lyon Business School.
