

Biography

Francisco was until recently a modeler/analyst at the International Transport Forum (ITF) in the OECD where he followed all rail related topics. He has worked on shared mobility, decarbonizing transport and freight modelling. He was country lead for Argentina of the Decarbonising Transport in Emerging Economies project and author of the ITF's Transport Outlook 2021 freight chapter. Recently he launched a book on "The Railways in Portugal: Past, present and future". He is a civil engineer with experience in the planning and management of major civil construction projects, including transport infrastructure. He has a PhD and Master's in Transportation Systems from Instituto Superior Técnico in the MIT Portugal program.
